EDUCATION HISTORY

BUDI LUHUR UNIVERSITY - BACHELOR OF INFORMATION SYSTEM, 2020

- Kuliah Kerja Praktik = Made project "Rancangan SISTEM INFORMASI PELAYANAN DI KELURAHAN PETUKANGANSELATAN"

When creating projects when KKP I was involved in database creation design, editing the user interface, and a little bit of editing logic in the PHP programming language. At that time I created an information system in the village that could store people's data there and print automatic letters so I didn't have to write and type letters from scratch.

- Skripsi = Made project "RANCANGAN ENTERPRISE RESOURCE PLANNING UNTUK MENINGKATKAN KINERJA PENJUALAN PADA PONCA FOOD"

During my thesis, I made a design on the Enterprise Resource Planning design for the client. I started from analyzing business processes then I made a proposal system, database design, after that I made a prototype using Adobe XD so that when the client wanted to implement the Enterprise Resource Planning system they already had the concept and design
